

NACHIKETH JOSHI

813-897-1511 | New Jersey | nachikethjoshi28@gmail.com | [linkedin.com/nachikethjoshi](https://www.linkedin.com/in/nachikethjoshi)

PROFESSIONAL SUMMARY

Versatile Software Engineer with experience in building production-scale backend systems, ML infrastructure, and data engineering pipelines using Python, Java, and C++. Proven track record deploying ML models, optimizing distributed systems, and reducing operational costs by 50%+ through automation and performance tuning. Expertise in microservices architecture, cloud infrastructure (AWS, Docker, Kubernetes), and quantitative systems for high-throughput environments.

WORK EXPERIENCE

Consultant - Synechron, New Jersey

Software Engineer/ Python & AI Developer - Client: *Bank Of America*

Feb 2026 - Present

- Designed and deployed **cloud-based ML services for performance and capacity management** across large-scale banking infrastructure, **improving resource utilization by 50%**.
- Automated performance report generation and internal workflows using **Python, FastAPI, and LLM frameworks (prompt engineering, FastMCP)**, reducing manual effort by **75%** and improving operational efficiency.
- Developed observability and monitoring solutions using **Splunk** and automation frameworks, reducing **mean time to detection by 50%** and accelerating incident **resolution by 25%**.

Data Analyst/ Software Engineer - *Sans America*, New Jersey

Mar 2025 - Feb 2026

- Developed **backend services and automation workflows** using Python for **production log processing** and production analytics systems.
- Built **structured data processing pipelines** to ingest, classify, and transform unstructured operational data, reducing incident triage time by **40%**.
- Implemented **error handling**, and **workflow automation** to improve reliability of **distributed processing systems**.
- Deployed and maintained backend workloads and processing pipelines on **AWS**, supporting scalable analytics systems.

Systems Engineer - *Tata Consultancy Services*, Hyderabad

Jun 2021 - Dec 2022

- Engineered a **3GPP-standardized Mission Critical Push-to-Talk (MCPTT) platform** using **Java and C++** for real-time enterprise communications, ensuring low-latency voice transmission and high service reliability.
- Designed and developed **RESTful microservices using Spring Boot and Java/J2EE** supporting **scalable distributed backend services**.
- Collaborated with leading telecom providers including **Ericsson, Verizon, and SouthernLINC Wireless**, delivering mission-critical communication applications in Java.
- Automated CI/CD pipelines using Jenkins, **containerized services with Docker**, and deployed microservices on **AWS ECS**, reducing deployment time by **40%**.
- Contributed across the full **Software Development Life Cycle (SDLC)**, including design, development, testing, deployment, and production maintenance of backend microservices, enabling **30% faster release cycles**.

PUBLICATIONS

Abstractive Text Generation using the BART Architecture: Data Preparation and Fine-Tuning for Coherent Summaries

- Joshi, Nachiketh. (2025). "Abstractive Text Generation using the BART Architecture: Data Preparation and Fine-Tuning for Coherent Summaries." [SSRN. DOI: 10.2139/ssrn.5741584](https://ssrn.com/abstract=5741584)**

EDUCATION

Master of Science in Computer Science - University of South Florida, Tampa, FL.

Jan 2023 - Dec 2024

Bachelor of Technology in Computer Science - Dr. B V Raju Institute of Technology, India.

Jul 2017 - May 2021

SKILLS

Programming Languages: Python, C++, Java

Backend Development: Microservices Architecture, REST APIs, FastAPI, Distributed Backend Services, Spring Boot

Quant Skills: Econometrics, Regression analysis, Quantitative Trading, Discretionary Trading, Statistical Modelling, Mathematical Modelling, Machine learning, Neural Networks (LSTM's, CNN's)

AI & ML: Tensorflow, Keras, Scikit, Deep learning, Natural Language Processing, Computer Vision, Prompt Engineering

Cloud & Infrastructure: AWS, Azure, Docker, Kubernetes, Unix/Linux

Databases: MySQL, MongoDB, NoSQL, PostgreSQL

Development Practices: Agile/Scrum, Unit Testing, Debugging, Maintenance, Code Reviews

CERTIFICATIONS

- [**Tensorflow Developer Professional Certification - Deeplearning.AI**](#)
- [**Python for Data Science Certification - IBM**](#)
- [**Database Design and Programming with SQL - Oracle Academy**](#)

ACHIEVEMENTS

- Recognised by the senior leadership at **Tata Consultancy Services** for **outstanding engineering performance and delivering high-impact systems** ahead of schedule.
- Achieved a **5-Star Gold** rating in **DSA/ Problem Solving on HackerRank**, demonstrating strong core problem solving proficiency.
- Ranked within the **top 2.87% of active Chess.com players globally** in March 2026.
