

NACHIKETH JOSHI

Tampa, FL | 813-897-1511 | nachikethjoshi01@gmail.com

EDUCATION

Masters in Computer Science, University of South Florida | 2023 - 2024 | Tampa, FL

GPA: 3.68/4.0; **GRE:** Math 168

Bachelor of Technology in Computer Science, BVRIT - JNTUH | 2017 - 2021 | Hyderabad, India

GPA: 8.85/10.0 (Advance Math : 10/10)

AWARDS & HONORS

- **Awarded Certificate of Excellence** from TCS for outstanding performance and innovation in large-scale distributed systems and delivering projects before deadline.
- Secured **1st place** in a **creative communication competition** organized by Club Inquisitive, BVRIT.
- Ranked **top 10%** of Chess players worldwide.

PROFESSIONAL EXPERIENCE

Data Scientist, Sans America | Mar 2024 - Present | New Jersey, NJ

- [Sans America Inc.](#) is a cutting-edge U.S. technology and analytics solutions firm, specializing in scalable data systems, automation and modeling platforms that drive enterprise performance and decision-intelligence.
- Engineered scalable data pipelines in Python and SQL to process and validate **3M+** market and fundamental data points daily, enabling **reliable feature generation**, signal research, and **high-frequency analytics**.
- **Developed modular backtesting frameworks** with integrated statistical and predictive models, improving strategy evaluation efficiency by 30% and strengthening model reliability and automation.

Data Systems Engineer, Tata Consultancy Services | Jun 2021 - Dec 2022 | Hyderabad, India

- Designed ETL pipelines and analytics dashboards processing **50M+ telecom records weekly**, applying quantitative performance analysis to accelerate anomaly detection and **cut false-alert rates by 30%**.
- Optimized distributed **Java/Python services** for **Verizon and Ericsson**, improving reliability and throughput by **50%** across large-scale, mission-critical network systems.

Machine Learning Research Intern, Cybermotion Technologies | Feb 2019 - Jan 2020 | Hyderabad, India

- [Cybermotion Technologies](#) is an **AI and data-driven research firm** collaborating with the **Indian Space Research Organisation (ISRO)**, **Defence Research and Development Organisation (DRDO)**, and Council of Scientific and Industrial Research (CSIR) on **advanced modeling**, simulation, and automation projects.
- Applied **machine learning and quantitative modeling** to sensor-driven data, improving prediction accuracy by **25%**, reducing false predictions by **30%**, and increasing simulation efficiency by **50%**.

QUANT RESEARCH PROJECTS

Cross-Sectional Seasonal Momentum and Reversal Strategies in Crypto Assets

- Researched a cross sectional, long-short seasonal-momentum strategy in crypto with a **backtested sharpe of 1.8 and an Information Ratio of 1.4** after accounting for fees, commissions, and expected slippage
- Researched a **multivariate regression-based reversal model** across correlated assets, combining both approaches to enhance performance and reduce portfolio volatility.

Volatility-Weighted Multi-Strategy Portfolio in Crypto Markets

- Integrated multiple momentum and reversal strategies using **volatility-based allocation**, achieving a **Sharpe ratio above 2.0** and **Information Ratio of 1.2** after transaction costs.
- Implemented **dynamic weighting and portfolio rebalancing techniques** to improve risk-adjusted returns and stability across market regimes.

PROGRAMMING: Python (Pandas/NumPy/Keras), C++, R, MATLAB, Java, C, SQL

QUANT SKILLS: Econometrics, Regression analysis, Quantitative Trading, Discretionary Trading, Statistical Modelling, Mathematical Modelling, Machine learning, Neural Networks (LSTM's, CNN's), Academic Writing

INTERESTS: Chess, Trekking, Singing (I can sing in 8 different languages), Solving Sudoku puzzles

LANGUAGES: English, Hindi, Spanish, Marathi, Telugu

CERTIFICATIONS : Certified TensorFlow Developer, Data Science certification - IBM
