WORK EXPERIENCE

Software Engineer (Python & AI Developer) - *Bank Of America, New Jersey*

Feb 2026 - Present

- Designed and deployed cloud-based ML services for performance and capacity management across large-scale banking infrastructure, improving resource utilization by 50%.
- Automated document generation and internal workflows using **Python, FastAPI, and LLM frameworks (prompt engineering, FastMCP)**, reducing manual effort by **90%** and improving operational efficiency.
- Developed observability and monitoring solutions using **Splunk** and automation frameworks, reducing **mean time to detection by 30%** and accelerating incident **resolution by 50%**.

Software Engineer - *Sans America, New Jersey*

Mar 2025 - Feb 2026

- Developed backend services and automation workflows using Python for **production log processing** and production analytics systems.
- Built **structured data processing pipelines** to ingest, classify, and transform unstructured operational data, reducing incident triage time by **40%**.
- Implemented **error handling**, and **workflow automation** to improve reliability of **distributed processing systems**.
- Deployed and maintained backend workloads and processing pipelines on **AWS**, supporting scalable analytics systems.

Systems Engineer - *Tata Consultancy Services, Hyderabad*

Jun 2021 - Dec 2022

- Engineered a 3GPP-standardized Mission Critical Push-to-Talk (MCPTT) platform using **Java and C++** for real-time enterprise communications, ensuring low-latency voice transmission and high service reliability.
- Designed and developed **RESTful microservices using Spring Boot and Java/J2EE** supporting **scalable distributed backend services**.
- Collaborated with leading telecom providers including Ericsson, Verizon, and SouthernLINC Wireless, delivering mission-critical communication solutions within the telecommunications domain.
- Automated CI/CD pipelines using Jenkins, **containerized services with Docker**, and deployed microservices on **AWS ECS**, reducing deployment time by **40%**.
- Contributed across the full **Software Development Life Cycle (SDLC)**, including design, development, testing, deployment, and production maintenance of backend microservices, enabling **30% faster release cycles**.

AI & ML Research Associate - *Cybermotion Technologies, Hyderabad*

Feb 2019 - May 2019

- Developed an AI-powered Learning Management System (LMS), "**AI Educator**" implementing Python-based machine learning components to evaluate and monitor learner performance.
- Built machine learning models using **Tensorflow, GAN's, DKT (Deep Knowledge Tracking)** to analyze learner behavior, **performance trends**, and engagement patterns within the platform's educational datasets.

PUBLICATIONS

Abstractive Text Generation using the BART Architecture: Data Preparation and Fine-Tuning for Coherent Summaries

- Joshi, Nachiketh. (2025). "Abstractive Text Generation using the BART Architecture: Data Preparation and Fine-Tuning for Coherent Summaries." [SSRN. DOI: 10.2139/ssrn.5741584](https://ssrn.com/abstract=5741584)**

EDUCATION

Master of Science in Computer Science - University of South Florida, Tampa, FL.

Jan 2023 - Dec 2024

Bachelor of Technology in Computer Science - Dr. B V Raju Institute of Technology, India.

Jul 2017 - May 2021

SKILLS

Programming Languages: Python, C++, Java

Backend Development: Microservices Architecture, REST APIs, FastAPI, Distributed Backend Services, Spring Boot

AI & ML: Tensorflow, Keras, Scikit, Deep learning, Natural Language Processing, Computer Vision, Prompt Engineering

Cloud & Infrastructure: AWS, Azure, Docker, Kubernetes, Unix/Linux

Databases: MySQL, MongoDB, NoSQL, PostgreSQL, Redis, CockroachDB

CERTIFICATIONS

- [Tensorflow Developer Professional Certification](#) - [Deeplearning.AI](#)
- [Python for Data Science Certification](#) - IBM
- [Database Design and Programming with SQL](#) - Oracle Academy
